## Polyurethane Bush

The fitment of Bearmach Polyurethane Bushes has been developed to give more positive location at pivot or fulcrum points. These suspension components are particularly recommended if you regularly tow or carry heavy loads. These bushes have a high capacity to bear tension and compression and have been tested at temperatures from -100°C to + 100°C. They are resistant to deterioration and swelling caused by oil, grease or chemicals. Shock bushes not included.

## Detroit Locker Rover Diff 10 Spline (inc Carrier)

The Detroit Locker is a fully automatic locking traction differential that is well known for premium performance and dependable operation. Preload devices between the side gears deliver 100% torque and power to both drive wheels yet unlock automatically to permit necessary wheel speed differentiation. The Detroit Locker is trouble-free as it does not require service adjustments or special lubricants. Easy to install, no special tools or case modifications required. One year Limited Warranty.

## TrueTrac Diff Locker

This unit features a gear-type limited slip design (no clutch or friction plates to wear out). Its positive gear action automatically splits the torque with none of the steering problems associated with other traction "diffs". Power transfer is so smooth that it is unnoticeable through the steering wheel when fitted in front drive steering axles. It performs as a standard differential on normal highway driving - then automatically engages when needed in wet, muddy or icy conditions.
